- ▶ Textbook are well adopted at undergraduate level curriculum in various universities
- ▶ Thousands of SBA, SCE, OSCE and other preparatory books like USMLE, MRCP, FRCS, hands on guides to laboratory studies, clinical diagnosis and experimental techniques

MCQs

Multiple Choice Question Modules for Self-evaluation. MCQs can be used by students to revise the syllabus before examination, trainees looking for postgraduate studies and academicians formulating tests.

8. A 65-year-old woman is being investigated prior to possible hip replacement for osteoarthritis. She has fairly well-controlled multiple myeloma, although she has increased circulating myeloma protein. During her assessment she appears very tense, is hyperventilating and then develops carpopedal spasm. However, a plasma calcium measurement taken at this time is normal. Which of the following is the most likely to have caused her spasms?

- Non-specific muscle cramps
- Respiratory alkalosis combined with hypoproteinæmia
- Respiratory acidosis combined with hypoproteinæmia
- Respiratory alkalosis combined with hyperproteinæmia
- Respiratory acidosis combined with hypoproteinæmia
